SOHAM METHE

AI ENGINEER

sohammethe@gmail.com | +91 9860249745 | LinkedIn: Soham Methe | GD Profile: soham-methe | LeetCode: maha1kal
Nanded, Maharashtra, India

Profile Summary

AI Engineer and M.Tech Artificial Intelligence in Signal Processing student at COEP Technological University with a B.Tech in Computer Engineering, focused on developing intelligent and scalable AI systems. Hands-on experience across data processing, model training, evaluation, Computer Vision, NLP, Generative AI, and AI application development. Proficient in Python, Machine Learning, Deep Learning, FastAPI, SQL, PostgreSQL, Docker, Git/GitHub, and Linux, with experience using TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, OpenCV, and Matplotlib. Built real-world AI solutions integrating AI models with backend systems, databases, automation, and analytics. Experienced as a Machine Learning Intern and Python Developer Intern, with additional leadership experience as a Google Student Ambassador and college Vice President. Interested in Generative AI, Agentic AI, MLOps and scalable AI architectures.

Education

COEP Technological University July 2026 – Present
M.Tech in Artificial Intelligence in Signal Processing Pune, Maharashtra, India

Dr. Babasaheb Ambedkar Technological University (DBATU) – G.T.M.C. Nanded, Maharashtra, India 2022 – 2026
B.Tech in Computer Engineering | CGPA: 7.00/10.0

Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence & Machine Learning, Computer Vision, Natural Language Processing

Internship

Machine Learning Intern October 2025 – December 2025
EduVersity Remote

- Developed and evaluated machine learning models for classification and prediction use cases.
- Worked on 5 ML projects: Credit Card Fraud Detection, Diabetes Prediction, Accident Survival Prediction, Second-Hand Car Price Prediction, and Music Genre Classification.
- Performed data preprocessing, exploratory data analysis, feature engineering, model training, and evaluation using Python and ML libraries. Applied appropriate ML techniques to analyse datasets and generate predictive results.

Google Student Ambassador August 2025 – December 2025
Google Student Ambassadors India Nanded, Maharashtra

- Led technical workshops and community events promoting Google technologies across campus.
- Mentored 500+ students in AI/ML, cloud computing, and software development best practices.

Python Developer Intern August 2023 – September 2023
DreamWebies Pvt. Ltd. Nanded, Maharashtra

- Developed production-ready Python applications using the Django framework for client projects.
- Collaborated with cross-functional teams to deliver scalable web solutions within tight deadlines.

Projects

CIVICI – AI-Powered Government Complaint and Resolution Platform
Python, TensorFlow, Computer Vision, NLP, Image/Video/Audio Processing, FastAPI, PostgreSQL

- Built an AI-powered civic complaint platform integrating 8+ government departments, processing image, video, and audio evidence for automated issue analysis and classification.
- Implemented Computer Vision and NLP pipelines for evidence analysis, including real-time object detection and CNN-based classification of weapons and hazards, achieving 82% accuracy.
- Designed intelligent time-slot estimation and nearest-officer assignment based on complaint type, location, and operational requirements.
- Built secure dual-camera capture with pre-buffer recording and end-to-end encryption, along with officer dashboards and AI-generated case summaries, reducing case-processing time by 40%.

AI Smart Chair – Real-Time Posture Monitoring System
Python, OpenCV, MediaPipe Pose, Computer Vision, Machine Learning

- Developed an AI-enabled smart chair for real-time posture monitoring using integrated chair hardware and external CCTV/laptop camera input.

- Used MediaPipe Pose and OpenCV to detect body landmarks and analyse sitting posture.
- Extracted joint angles and body-alignment features to classify correct and incorrect sitting postures.
- Implemented real-time posture alerts for prolonged incorrect sitting positions.

Modern GUI Desktop Application (macOS)
Python, Tkinter, GUI Design

- Built a cross-functional desktop application using Python and Tkinter for the macOS environment.
- Designed a user-friendly interface with responsive layouts, custom themes, and efficient control handling.
- Improved user experience through optimised navigation and interactive UI components.
- Applied UI/UX best practices to create a clean and scalable application design.

Bharat Ka Prashan – AI-Powered Citizen Question Intelligence Platform
Python, FastAPI, NLP, Semantic Search, Sentence Transformers, Hugging Face, LLMs, PostgreSQL, Text Classification, Content Moderation

- Built an AI platform to collect, analyse, classify, and prioritise citizen questions for expert and podcast conversations.
- Implemented semantic similarity and embedding-based clustering to identify meaningful and repeated questions.
- Developed automated text classification, intent extraction, and question ranking to surface high-value public concerns.
- Implemented automated content moderation to detect and filter abusive, spam, and inappropriate submissions.

Technical Skills

Programming: Python, SQL, Java, C
AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, Agentic AI, Computer Vision, NLP, Image Processing, Video Processing, Audio Processing, Digital Signal Processing, Model Training
Frameworks & Libraries: TensorFlow, PyTorch, Matplotlib, Scikit-learn, NumPy, Pandas, OpenCV
Databases & Backend Development: PostgreSQL, MySQL, SQL, FastAPI, REST APIs
DevOps Tools & Platforms: Git/GitHub, VS Code, Jupyter, n8n, Eclipse, Docker, Docker Hub, CustomGPT
Core Competencies: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, System Design, Software Engineering
Data & Analytics: Power BI, Data Analysis, Data Visualisation, Data Operations

Achievements & Leadership

- **Vice President:** Led 2 years as college student body, organised technical and nontechnical events.
- **Smart India Hackathon:** Represented college at national-level innovation challenge.
- **Avishkar Project (DBATU):** Participated in a college/university-level innovation challenge.
- **Active LeetCode Contributor:** Solved 500+ LeetCode problems maintaining a consistency streak; earned 100 Days Badge 2025 and achieved 85.6% accuracy across algorithms, DSA and dynamic programming.

Certifications & Training

AI Agents for Beginners | Google AI for Higher Education | Google AI for K–12 Educators | Generative AI | Data Science & Machine Learning | Cybersecurity & IT Automation (MSDC) | Course on Computer Concepts (CCC) | IoT Workshop | Tata GenAI-Powered Data Analytics Job Simulation (Forage) | Python Workshops | IIT Innovation Challenge Participant | TATA Crucible Campus Quiz 2025 | Outskill Generative AI Mastermind | Databricks GenAI | Artificial Intelligence with Python (FUEL).
